Queensland Parliament chose HYT TC700

Recently the security department within Queensland Parliament decided to replace their aging hand held radios.

Queensland Parliament was using Motorola GP328's hand held radios incorporating Motorola MDC1200 signaling for ANI (automatic number identification) and emergency call.

One of the criteria's for the replacement radios was they had to be compatible with the Motorola MDC1200 signaling system.

Queensland Parliament ended up choosing the HYT TC700 not only because its HDC1200 signaling was compatible with Motorola's MDC1200 signaling but it also offered additional standard safety features such as mandown with voice message plus the ability for the radio to be programmed to automatically go into a series of receive and transmit cycles after the emergency button has been pressed.

Customer's Voice

Mr. Michael Wilkins Queensland Parliament security manager said they chose the HYT TC700 because of the radios ability to interface to the existing Motorola MDC1200 signaling system plus its compact size, light weight, ultra high capacity battery (allowing the radio to be used over two shifts), and its comprehensive list of safety features allowing Queensland Parliament to meet its OH&S obligations.

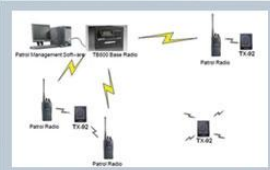

Westfield Shopping Centre chose HYT TS6200 Patrol Record system

Recently HYT Electronics installed and commissioned a two-way radio Patrol and Record system for Westfield Northlakes shopping centre in Brisbane.

Previous to the Patrol and Record system, Westfield staff was using a wand system to record their movements as they moved around the centre.

One of the drawbacks with the old wand system is that staff had to carry a wand and pass it over Ibuttons (installed in various places around the shopping centre) in order to record their movements. This meant staff had to spend time walking to each Ibutton while carrying out their normal duties.

With the new HYT TS6200 Patrol Record System, the wand is replaced with a TC700 patrol hand held radio. When a TC700 patrol hand held radio approaches a TX92 Patrol Point, the radio automatically sends (in real time) to the TS6200 Patrol Record systems, the Patrol Point's ID, the radio ID and the time and date. This data is recorded and displays on TS6200 Patrol Record System for immediate and or later analysis.

Customer's Voice

"I am happy to advise the HYT Patrol Record system installed recently is fully operational and working to and exceeding our expectations" says Mr. Darrin Sneesby, Security Manager Westfield Northlakes.

The program is easy to use and the reporting system is very comprehensive.

The system provides a very useful tool in the day to day running of the shopping centre.

It has now become a fundamental tool in the daily running of the shopping centre, helping to improve human resource efficiency and providing added security for staff members.

In litigation cases where shoppers claims they have slipped over spillages on the floor, we can now show our duty of care from records stored in the Patrol Record system's data base.

The data can be used to support our claim that areas in question had been cleaned, prior to the time of the reported incidences.

Customers Who Chose Our Products and Services

Professional Two-way Radio

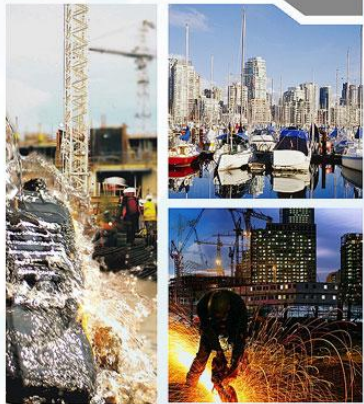

Light! Small! Robust!
All in control by one hand!

TC-518

- 70MHz Wide-band coverage
- User-friendly volume adjustment
- One hand operation
- 1100mAh Li-ion battery for 11 hours of work time @ 5/5/90
- Power off by software
- Power on light indication
- Built-in scrambler

Professional Two-way Radio

Washable!
Total dust proof!
Most Durable!

TC-610/610P

- Dust/Water Protection Class IP66
- Powerful audio up to 1.5W output with 45mm
- Wide Communication Range with UHF 5W
- Reliable Mechanical Design global patented battery connecting structure
- Double Injection Moulding and Anti-skid Design

Digital Portable Radio

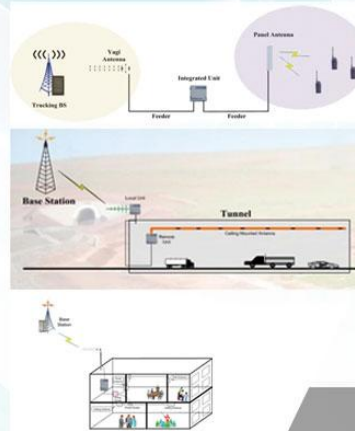

Cutting Edge Digital Technology!
1 Meter Submersible Water Proof!
DMR Open Standard based on TDMA!

PD780

- Superior Voice
- High Frequency Spectrum Efficiency
- Durable Battery
- Dual Modes
- Secure Communication
- Versatile Data Services
- Further Development Port
- Ergonomic Design
- Reliable Quality

Bi-Directional Amplifier

Best weapon to coverage issue.
Anywhere! Anytime! Most Convenient!

TS9201

- Selectively Amplifying, filtering irrelative signal
- Simultaneous repeating of multi-channel signals
- No Need Of Extra Frequency Resource
- Modularized design
- Strong Compatibility: MPT-1327, Tetra, APC025, iDEN, LTR, APC025

EARPIECE RECEIVERS

Comfort Always™

Now Wireless Pacific bring you even more choice. Our expanded range of plug-in earpieces deliver exceptional performance and are available in 2.5mm twist & lock, 3.5mm standard fit, or 3.5mm threaded "V" series versions. Economically priced they keep personal issue costs down while keeping workplace hygiene and employee morale high (what ensuring your OHS duty of care Imperatives).

Made to be comfortably worn all day long - the high comfort design means they'll feel like they melt away within moments of fitting. Accessories that deliver feel good, crystal clear audio, yet are priced so you can choose what best suits your operational needs without compromising your budget.

Audio never felt this good!

FEATURES

- Feel good polymers
- Clear crisp audio
- Resilient curly cables
- Premium quality connectors

LI-ION & NI-MH BATTERIES

Wireless Pacific is proud to offer an extensive range of **cadmium free** batteries, which will allow us all do our bit to protect the planet. Our green range of Lithium Ion (Li-Ion) and Nickel Metal Hydride (Ni-MH) are not only environmentally friendly but are dramatically smaller and/or significantly lighter than all other battery technologies.

Our exclusive range of **Long Life** Ni-MH range provide up to **1000 recharge cycles - doubling** the working life. This effectively halves your ongoing operating cost when compared to most other Ni-MH batteries available.

to suit

- Icom
- Kenwood
- Macom
- Motorola
- Sepura
- Simoco
- Tait
- Vertex

Ultra-Light & More Power - Genuine Value -

FEATURES

Our enhanced batteries are only assembled in Taiwan and China - the OEM home to many global products from such industry leaders as: Apple, Cisco and Dell, to name but a few. We only use the freshest of premium Li-Ion cells from the world's leading cell maker Sanyo, Panasonic and Yuasa to ensure absolute electrical performance. We use ultra-reliable flex circuits where sensible and we ultrasonically weld them into a rugged, flame retardant industrial strength case. We think it's a better battery recipe!

- Ultra-light
- High capacity
- Non-toxic
- Japanese cells
- Great price
- Longer shift life
- Cadmium Free**
